## Door Construction

Model 9800 shown in horizontal design with clear glass.

- A rich, wood-grain-patterned fiberglass outer surface is bonded to a specially-engineered steel garage door using patented technology to combine the benefits of both materials.
- Fiberglass surface won't dent, crack, split or splinter like wood doors can.
- Resists expansion and contraction with temperature swings for long lasting finish.
- Surface can't dent or rust like steel.
- The foamed-in-place polyurethane insulation is chemically bonded to each steel inner section, creating a structure with higher strength and rigidity.
- Integral hinges provide maximum strength between sections and add stability compared with ordinary vertical hinges. Hinges are factory-installed for proper alignment and smoother door operation.
- Wind load models available. 
- Heavy-gauge steel wraparound end caps trim-out door edges for better appearance, improved strength and to protect the foamed-in-place polyurethane insulation from damage.
- Horizontal struts on double-wide doors add rigidity for long life and smooth operation.
- Sound-absorbing insulation makes the door operate quieter and eliminates wind-rattling.
- SilentGlide™ rollers with nylon tires and solid steel shafts provide years of smooth, quiet, dependable service.
- Pinch-resistant door panels can help prevent finger injuries caused by closing garage door.
- Interior panels are finished in white steel with powder-coated interior hardware.
- An insulated garage door improves thermal efficiency and makes your house more green.

\* Wayne-Dalton® uses a calculated door section R-value for our insulated doors.

# Model 9800 Specifications

## Panel Designs

- Proprietary Therma-Tru® AccuGrain™ molding technology captures the realism of premium hardwood door panels.
- Four panel patterns are available - choose vertical, horizontal, horizontal V-groove or Sonoma stylings.
- 7' high doors are engineered with three section panels to reduce visual breaks. 8' high doors have four section panels.

V-groove 7' high

Horizontal 7' style

Vertical 7' high

V-groove 8' high

Horizontal 8' high

Vertical 8' high

Sonoma 7' high

Sonoma 8' high

## Safety & Security

- Pinch-resistant design helps push fingers out of harms way if accidentally placed near a closing door.
- The Wayne-Dalton TorqueMaster® Plus is the first counterbalance system to seal springs safely within a steel tube. It contains an anti-drop features that eliminates the risk of injury due to accidental release of tension.
- Tamper-resistant safety bottom brackets help avoid possible injury by preventing inadvertent loosening while the counterbalance cables are still under tension.

## Warranty

Model 9800 offers a Lifetime Limited Warranty against cracking, splitting, rusting through or section deterioration. See dealer for complete warranty details.

Cherry

## Energy Efficiency & Noise Control

- The R-7.6\* polyurethane insulation helps block street noise and is CFC-11 free, so its environmentally friendly.
- Bulb-shaped bottom seal remains flexible even in the cold to keep out bad weather. It blocks drafts and helps save energy.

\* Calculated door section R-value.
